

LIAM SMITH

Junior Python Developer | Data & Automation Enthusiast

Denver, CO | liam.smith.dev@gmail.com | +1 (720) 555-2390

github.com/liamsmith-dev | linkedin.com/in/liamsmith

- Professional Summary

Enthusiastic and quick-learning junior Python developer with a background in environmental science and data analytics. Skilled in scripting, data visualization, and automating reports using Python. Excited about using code to solve practical problems and bring insights from data.

- Professional Experience

Junior Data Developer - GreenByte Analytics | Denver, CO (Mar 2023 - Present)

- Developed Python scripts to automate weekly data reporting for sustainability KPIs.
- Used Matplotlib and Seaborn to visualize CO2 reduction metrics and publish reports.
- Cleaned and validated large CSV datasets using Pandas and NumPy.
- Created a dashboard prototype in Streamlit to display real-time environmental data.

- Technical Skills

Languages: Python, Bash, SQL

Libraries: Pandas, NumPy, Matplotlib, Seaborn, Streamlit

Tools: Git, JupyterLab, VS Code, Google Sheets API

Basic Knowledge: Flask, Power BI, Excel Macros

- Education

B.S. in Environmental Science - Colorado State University (Graduated: 2022)

- Certifications

- Python Basics - Real Python (2023)
- Data Analysis with Python - freeCodeCamp (2023)

- Projects

EcoMonitor Dashboard - Built a Streamlit app that tracks and visualizes energy usage data.

CSV Report Generator - Python script that processes and summarizes monthly data files.

API Weather Logger - App that collects weather data daily and stores it in SQLite.

- Languages

English (Fluent), German (Intermediate)
